

We design, build, and implement IT Solutions that enable businesses to operate at peak performance. It is more important now than ever before to understand the past, present, and future of not only your own internal operations, but of the quickly changing marketplace.

The Sterling IT Group can provide leadership to an entire project team or play a role in a larger project as a value-added resource. Specific areas of technical expertise include Project Management, ERP Consulting, Data Conversion, Data Analytics, and Database Development. We also provide project discovery services such as Readiness Assessment, Requirements Analysis, and Change Management.

Solution Offerings

Internet of Things (IoT)

- Define the information requirements and the most effective capture and data visualization methods
- Provide the Software Engineering required to collect, manipulate and present data from electronic sensors

Project Management

- Plan, source, and lead an entire project team or play a role in a larger project as a value-added resource

Readiness Assessments

- Infrastructure, change management, system selection criteria

Big Data

- Data Analytics - Executive Dashboards, KPI & business metrics, and reporting methodologies
- Data Migration and Conversion - Data conversion, ETL processes, and new system implementation

Cloud

- Assist clients in creating efficiencies and realizing cost savings by leveraging the capability of cloud services

Requirements Analysis

- Coordinate with stakeholders and users in defining and documenting system requirements
